Genetec ClearID Physical Identity & Access Management (PIAM)

Engineering & Licensing Reference Guide — Security Center 5.11 to 5.14 Cloud-Managed Identity & Visitor Self-Service

1. Licensing & Volume Tiers

Genetec ClearID is a cloud-based Physical Identity and Access Management (PIAM) platform integrated directly with Security Center Synergis via the on-premises ClearID Bridge Plugin. It automates access requests, area owner approvals, recertifications, contractor onboarding, and visitor management.

ClearID is licensed per active managed identity (1-Year, 3-Year, or 5-Year subscription matching system term) across four volume tiers, plus optional iPad Self-Service Visitor Kiosks and Multi-System Synchronization.

Genetec Part Number	Tier / Term	MSRP (USD)	Licensing Rule & Included Services
CID-IDENTITY-1Y / 3Y / 5Y	1 to 19,999 Identities	.00 / .06 / .00	Per active identity for 1Y, 3Y, or 5Y. Includes 2 hours of ClearID deployment consultation.
CID-IDENTITY-1Y/3Y/5Y-20K	20,000 to 49,999 IDs	.00 / .90 / .00	Per active identity in the 20k-49,999 volume band (1Y / 3Y / 5Y).
CID-IDENTITY-1Y/3Y/5Y-50K	50,000 to 99,999 IDs	.00 / .32 / .00	Per active identity in the 50k-99,999 volume band (1Y / 3Y / 5Y).
CID-IDENTITY-1Y/3Y/5Y-100K	100,000+ Identities	.50 / .45 / .00	Per active identity for 100,000+ identities (1Y / 3Y / 5Y).
CID-KIOSK-LIC-1Y / 3Y / 5Y	Visitor Kiosk License	,000 / ,100 / ,000	1 license per iPad Self-Service Visitor Kiosk (iPhone app does not require a kiosk license).
CID-MULTI-SYSTEM-1Y / 3Y / 5Y	Multi-System Sync	,000 / ,500 / ,000	Required when a ClearID account synchronizes identities across 2 or more Security Center systems.
CID-DELIVERY	Remote Onboarding	,500.00	8 hours of remote support services for initial ClearID account & Entra ID / HR connector setup.

2. Server Role & System Requirements

The ClearID Plugin role runs on a Security Center Directory or Expansion Server (Security Center 5.11+ required).

Resource Impact: Adds +2 GB RAM and +1 CPU core per Directory synchronization service. For >40,000 cardholders/identities on a unified server, Access Manager and Directory must be separated or sized to Recommended/High-Performance profile (16-32 GB RAM).
