Genetec Identity, Biometrics & Credential Synchronization Plugins

Engineering & Licensing Reference Guide — Card Synchronization, IDEMIA MorphoManager, ID Scanner, Control iD iDBridge & Princeton Identity

1. Plugin & SDK Licensing Matrix

This datasheet covers native and SDK-based identity enrollment, biometric template management, and external database synchronization plugins for Genetec Security Center 5.10 through 5.14.

Genetec Part Number	Plugin / Integration	MSRP (USD)	Connection Formula & Compatibility
GSC-1PSINGLECARD	Card Synchronization 4.1.1	,000.00	1 plugin license per 2 external data sources (SQL Server, Azure SQL, Entra ID Graph API, Oracle 12c, ODBC, CSV). Requires Pro or Enterprise.
GSC-1PMORPHOBIOMETRICS	Morpho Biometrics 3.1 (IDEMIA)	,500.00	1 plugin license per Security Center system. Certified with IDEMIA MorphoManager 9.8.6, 14.6.0.23, 15.3, and 16.6 (MorphoWave, Sigma, VisionPass).
GSC-1PIDSCANNER	ID Scanner 3.4.0 Plugin	.00	1 license per Security Desk client workstation with an attached passport/driver license scanner (AssureID, Gemalto/Thales, SnapShell).
GSC-1PADVANCEENROLL	Advanced Enrollment 3.3.0	,730.00	1 license per Directory. Supports HID Fargo HDP6600/DTC printers and HID Asure ID SDK 7.8.6.
GSC-1SDK-CONTROLID-IDBRIDGE	Control iD iDBridge	.00	1 SDK connection license per Control iD iDBridge middleware instance synchronizing facial/biometric readers with Synergis.
GSC-1SDK-PRINCETONIDENTITY-ACS	Princeton Identity ACS	.00	1 SDK connection license per Princeton Identity Access Control Suite server (Iris & facial biometric readers).
GSC-1SDK-PREFTECH-BIOS / PTWIDE-SUPREMA	Suprema BioStar 2 / BioLite	.00	SDK connection license for Suprema BioStar 2 integration (typically 2 SDK connections per client/server or GSC-SDK-SIASA-SUPREMA unlimited when hardware bought via Genetec).

2. Multi-Role Server Co-Hosting Specifications

Card Synchronization 4.1.1 & Morpho Biometrics 3.1 run as Security Center Plugin roles (+2 GB RAM, +1 CPU core each, SQL Express/Standard backend).

When co-hosting third-party biometric management servers (IDEMIA MorphoManager, Suprema BioStar 2 Server, or Princeton Identity ACS) on the same Windows Server as a Security Center Expansion role, provision an additional +8 GB RAM and +4 CPU cores (minimum 32 GB system RAM recommended) to prevent SQL memory contention with Synergis Access Manager.
