OVERVIEW

AMG570 series layer 2+ managed industrial Ethernet switches are designed in a thermally efficient DIN rail or wall mount housing and have 4 Gigabit Ethernet RJ45 ports with an additional 2 multi-rate SFP ports that support 100Mb, 1Gb and 2.5Gb for high speed data uplink into core networks, providing application and site flexibility.

Available as a non-PoE model as well as multiple PoE models for IEEE802.3at 30W and/or IEEE802.3bt 60/90W they are suitable for powering the latest high powered PoE devices over a wide industrial operating temperature range.

The AMG570-4G-2S-K series kits provide a single part code that combines the specific AMG570 industrial Ethernet switch with its appropriate industrial power supply, two industrial SFP modules for fiber connectivity as well as a DIN rail for mounting both devices and all the necessary power cables to operate the switch. All of this comes packaged in a single purpose made box for the most convenient deployment experience.
